

Technical Data Sheet

AF-403

Ingredient	Hydroxy compound aqueous emulsion
-------------------	-----------------------------------

Warranty	6 months (kept in a cool, dry place at room temperature)
-----------------	--

Applications	<p>AF-403 is used in the wet end of papermaking</p> <ul style="list-style-type: none">● Production technology of boxboard paper, white board paper and corrugated paper● Production technology of newsprint, carbonless copy paper, and cultural paper● Suitable for production processes using dry strength agents and sizing agents● Suitable for neutral and acid sizing processes
---------------------	--

Features	<ul style="list-style-type: none">● The product itself has low viscosity and is suitable for pumping and adding.● Does not affect the function of other papermaking chemicals, such as sizing agents and retention aids● Does not contain silicone oil components that can cause paper defects
-----------------	--

- Suitable for white water temperature
45~60°C, excellent degassing performance
and anti-foaming performance
-

Physical indicators

Exterior	White or slightly yellow milky liquid
Solid content	(28-30) %
pH value	6.0-8.0

- Instructions**
- Add directly for use, or dilute online for use
 - Consumption per ton of paper 100~500g
 - The optimal addition amount is determined according to the actual situation on site
 - The adding point is usually the white water pool under the net or the white water tank outside the machine.
-

- Precautions**
- There are no fatal or harmful ingredients to the human body, but try not to touch it directly or use it if it accidentally gets into the eyes, rinse with clean water
 - Storage at room temperature (5-40°C), away from direct sunlight

- Refer to the product' s Material Safety Data Sheet (MSDS) before use
-

Usage

- Not for human injection

restrictions

- This product is not tested or represented as suitable for medical or pharmaceutical use
-

Package

- 200kg plastic drum or 1000kg IBC drum
-
